CONCORD GROUP

CADRE MANAGEMENT SYSTEM

User Guide

How to sign in, enter the daily cadre, read the reports and dashboard – step by step.

For all users
Version 1.0 · October 2026

Better staffing.
Stronger teams.

About this guide

The Cadre Management System shows, every day and for every factory, how many people were **budgeted**, how many were **allocated**, and how many are really **present**.

This guide is written for everyone – you do not need any computer training. Each page shows a real screen of the system. **The numbered green circles** on the pictures match the numbered notes next to them.

What you can do with the system

- **Enter** the budget, allocated and absent people for each section, every day.
- **See at once** where you are short of people, with automatic totals.
- **Compare factories** side by side on the dashboard, for a day, a month or a year.
- **Download** reports and the dashboard to Excel, or print them.
- **Use it on any device** – computer, tablet or phone.

15 Questions and problems

Before you start

You need: a web browser (Chrome, Edge or Safari), the system address from your administrator, and your **username and password**. If you do not have these, ask your administrator.

1 Signing in

Every person has their own username and password. Everything you do is recorded under your name.

1. **Username** – type the username your administrator gave you.
2. **Password** – type your password. Press the eye icon to see what you typed.
3. **Remember me** – tick this on your own computer to stay signed in for 30 days.
4. **Forgot password?** – shows how to get a new one (ask your administrator).
5. **Sign in** – press it, or press `Enter`. You go straight to the Dashboard.

Step by step

1. Open the system address in your browser.
2. Type your username and password.
3. Press **Sign in**. If the details are right, the Dashboard opens.

Wrong password?

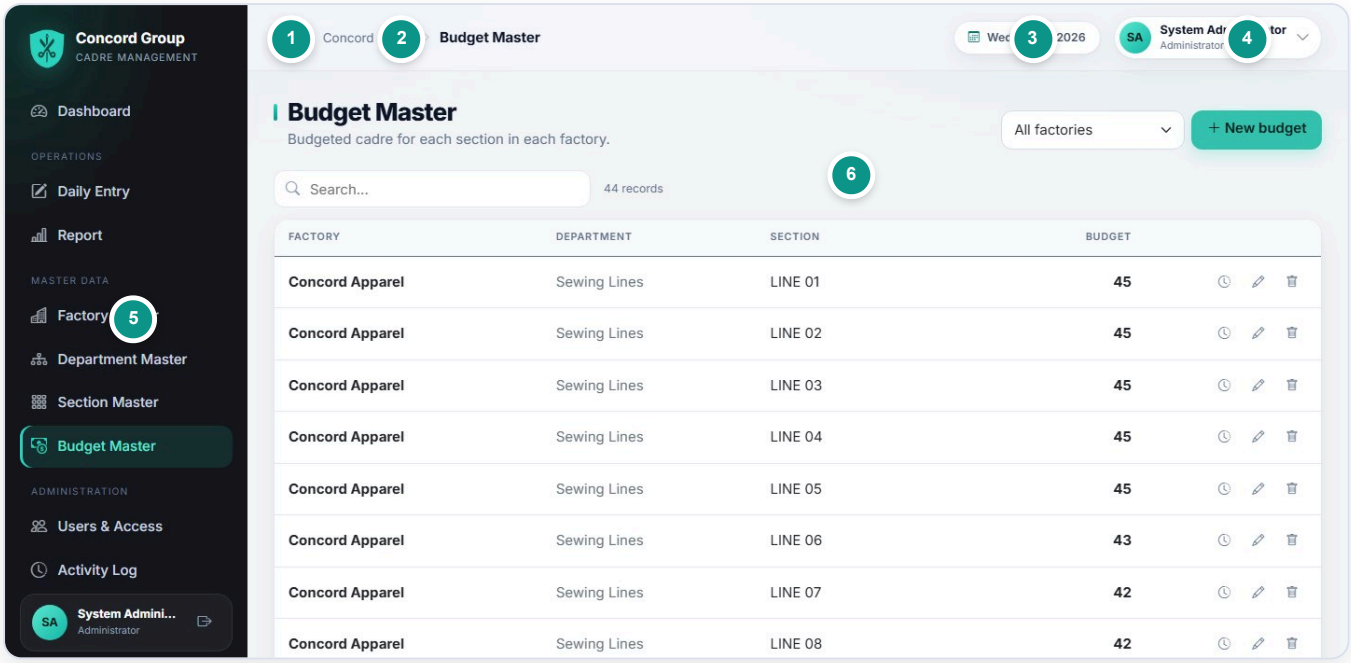

A red message says *"Invalid username or password"*. Check that `Caps Lock` is off (the page warns you if it is on) and try again. If it still fails, ask your administrator to reset your password. Do not share your password with anyone.

Public or shared computer?

Do **not** tick "Remember me". When you finish, always **sign out** (see the next page).

2 Finding your way around

Every screen has the same layout, so once you learn one you know them all.

1. **Menu button** – hides or shows the left menu. On a phone, it opens the menu.
2. **Where you are** – the name of the screen you are on.
3. **Today's date.**
4. **Your name** – click it to **change your password** or **sign out**.
5. **Left menu** – all the screens you are allowed to use. The one you are on is highlighted in green.
6. **Search box** – on list screens, type any word to find a row quickly.

The menu

MENU ITEM	WHAT IT IS FOR
Dashboard	The big picture: tiles, factory comparison, charts and the colour map.
Daily Entry	Type in the numbers for each factory, every day.
Report	The full table for one day, like the old Excel sheet. Download to Excel.
Factory / Department / Section / Budget Master	The lists the system is built on (names and budgets). ADMIN
Users & Access	Create people and decide what each can open. ADMIN
Activity Log	Who did what, and when. ADMIN

Changing your password

1. Click **your name** at the top right, then **Change password**.
2. Type your **current** password, then the **new** one twice (at least 6 characters).
3. Press **Update password**.

Signing out

Click your name at the top right and choose **Sign out** – or press the small arrow button beside your name at the bottom of the left menu. If you do nothing for about 8 hours, the system signs you out by itself.

3 Who can do what

What you see in the left menu depends on your **role**. If a screen is missing, you have not been given access to it.

ROLE	WHAT THIS PERSON CAN DO
Administrator	Everything: enter data, change the master lists, create users, see the Activity Log and download reports.
Super User	**Look at** every screen (dashboard, entry, report, lists) but **cannot change** anything. Good for managers who only need to read.
User	Only the screens the administrator ticks. For each screen the administrator chooses **View** (look only) or **Edit** (look and change).

Factory access

The administrator can also limit a person to **some factories only**. For example, a Guston Lanka supervisor can be allowed to see and enter **Guston Lanka only**. Such a person will only see their own factory on every screen – in the entry list, the report, the dashboard and the downloads.

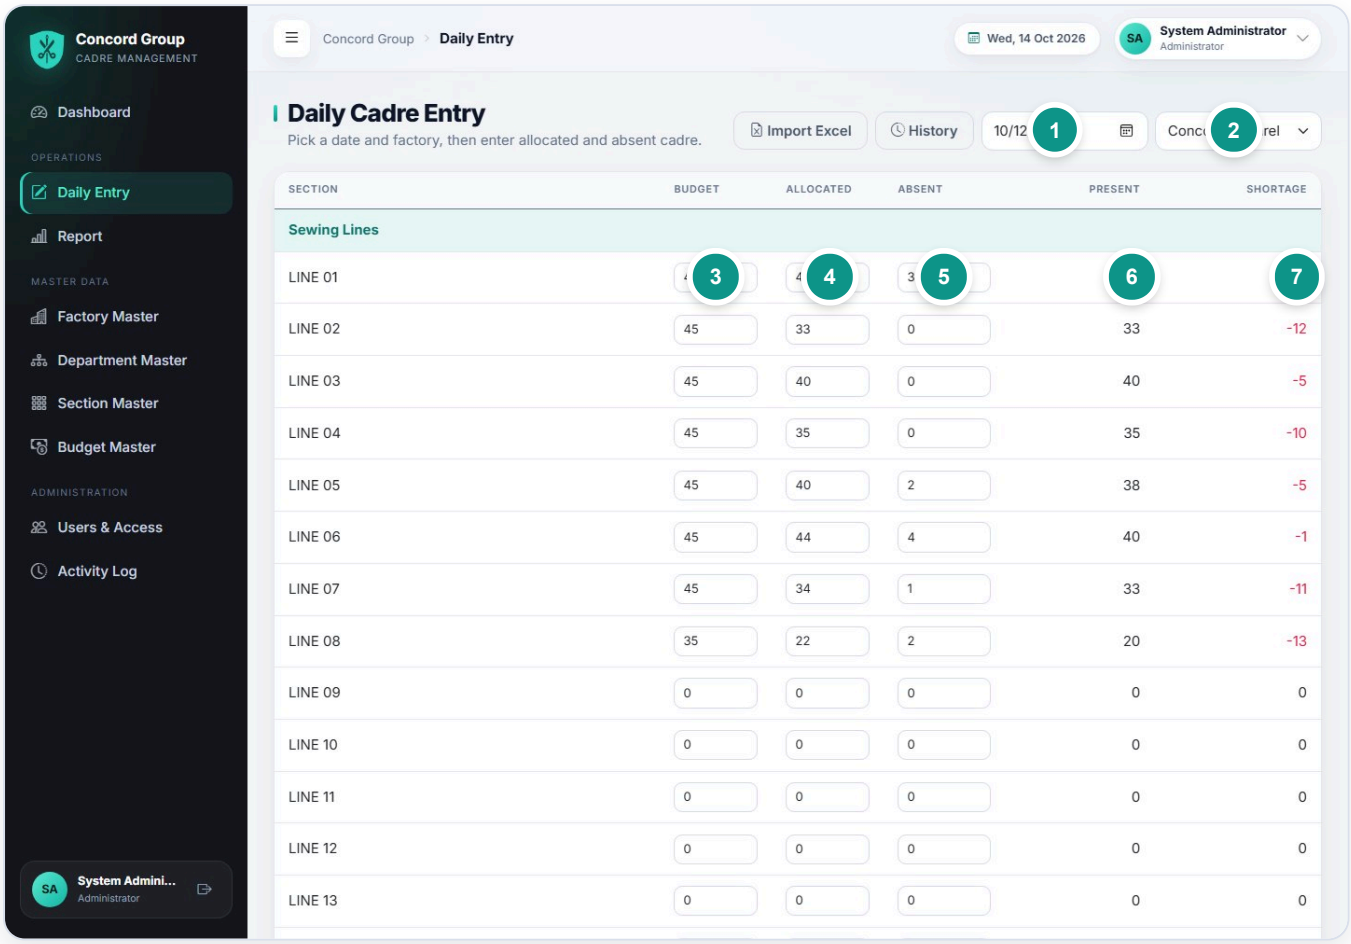

> **"Access denied" message?**
> It means your role does not include that screen or that action. This is not an error – ask your administrator if you need access.

Good habits

- Use **your own** username only. Never use someone else's.
- The system keeps a record of every sign-in and every change, with the name of the person who did it.
- Sign out when you leave your desk.

4 Daily Entry MAIN DAILY TASK

Here you type in the people numbers for one factory and one day. This is the screen most people use every day.

1. **Date** – choose the day you are entering.
2. **Factory** – choose your factory. The sections appear below.
3. **Budget** – the approved number. It is filled in for you; change it only if the budget is different for this day.
4. **Allocated** – how many people are assigned to this section today.
5. **Absent** – how many of them did not come.
6. **Present** – worked out for you: allocated minus absent.
7. **Shortage** – worked out for you: allocated minus budget. A red minus number means you are **short** of people.

Step by step

1. Click **Daily Entry** in the left menu.
2. Choose the **date**, then your **factory**. All departments and sections are listed.
3. For each section, type **Allocated** and **Absent**. Check the **Budget** is right.
4. Watch **Present** and **Shortage** change as you type. The **Total** row at the bottom adds everything up.
5. Press the green **Save entries** button (it stays at the bottom of the screen). A green “Saved” message appears.

4 Daily Entry – rules and tips

What the system checks

- **Absent cannot be more than Allocated.** If it is, the save is refused and a message tells you which section.
- **No negative numbers.**
- A section you leave at zero is simply **not stored** – nothing is lost.

Good to know

- You can come back and **correct a day** at any time: choose the same date and factory, change the numbers and save again.
- Every change is recorded in the Activity Log with the old and new value.
- If you leave the page without saving, your typing is lost – so press **Save entries** before you go.

If a section has no budget

All sections are shown, even those with no budget for your factory. You can still type allocated people there. The report and dashboard mark such cases as **"people but no budget"**.

History ADMIN

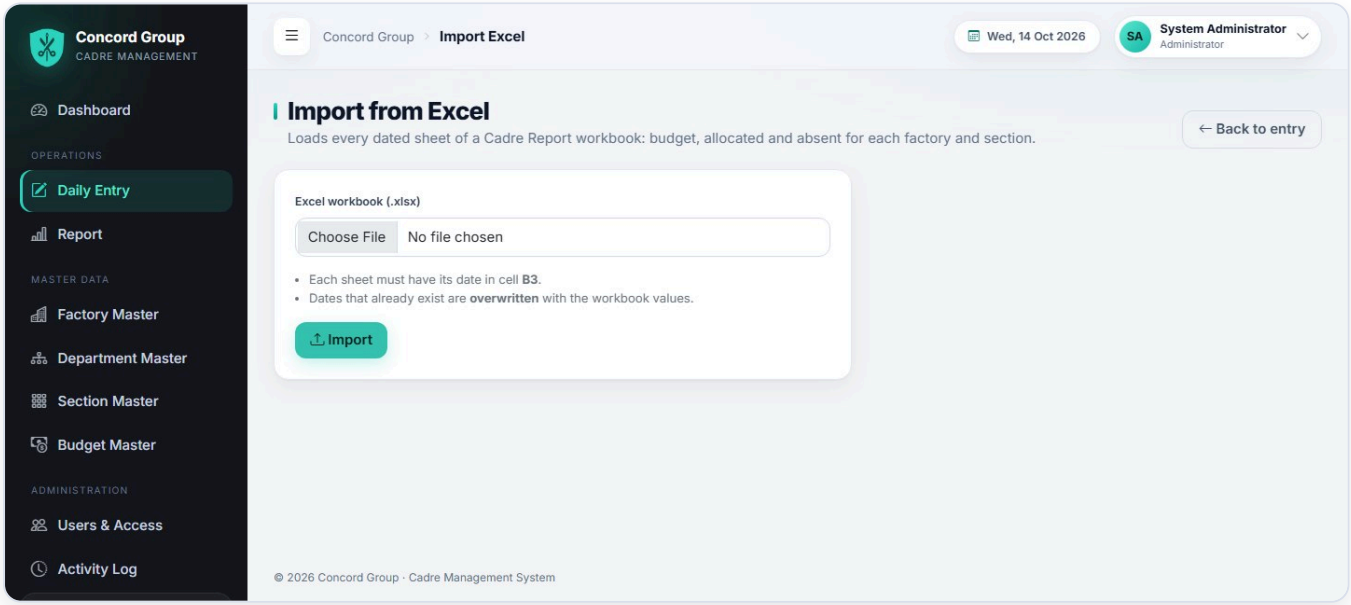

Administrators see a **History** button on this screen. It lists who entered or changed the numbers for that day and factory.

Tip – speed

Press `Tab` to jump from one box to the next. Type the number and press `Tab` again – you can enter a whole factory without touching the mouse.

5 Importing from Excel ADMIN / EDITORS

If you already have the daily Excel sheets, you can load many days at once instead of typing.

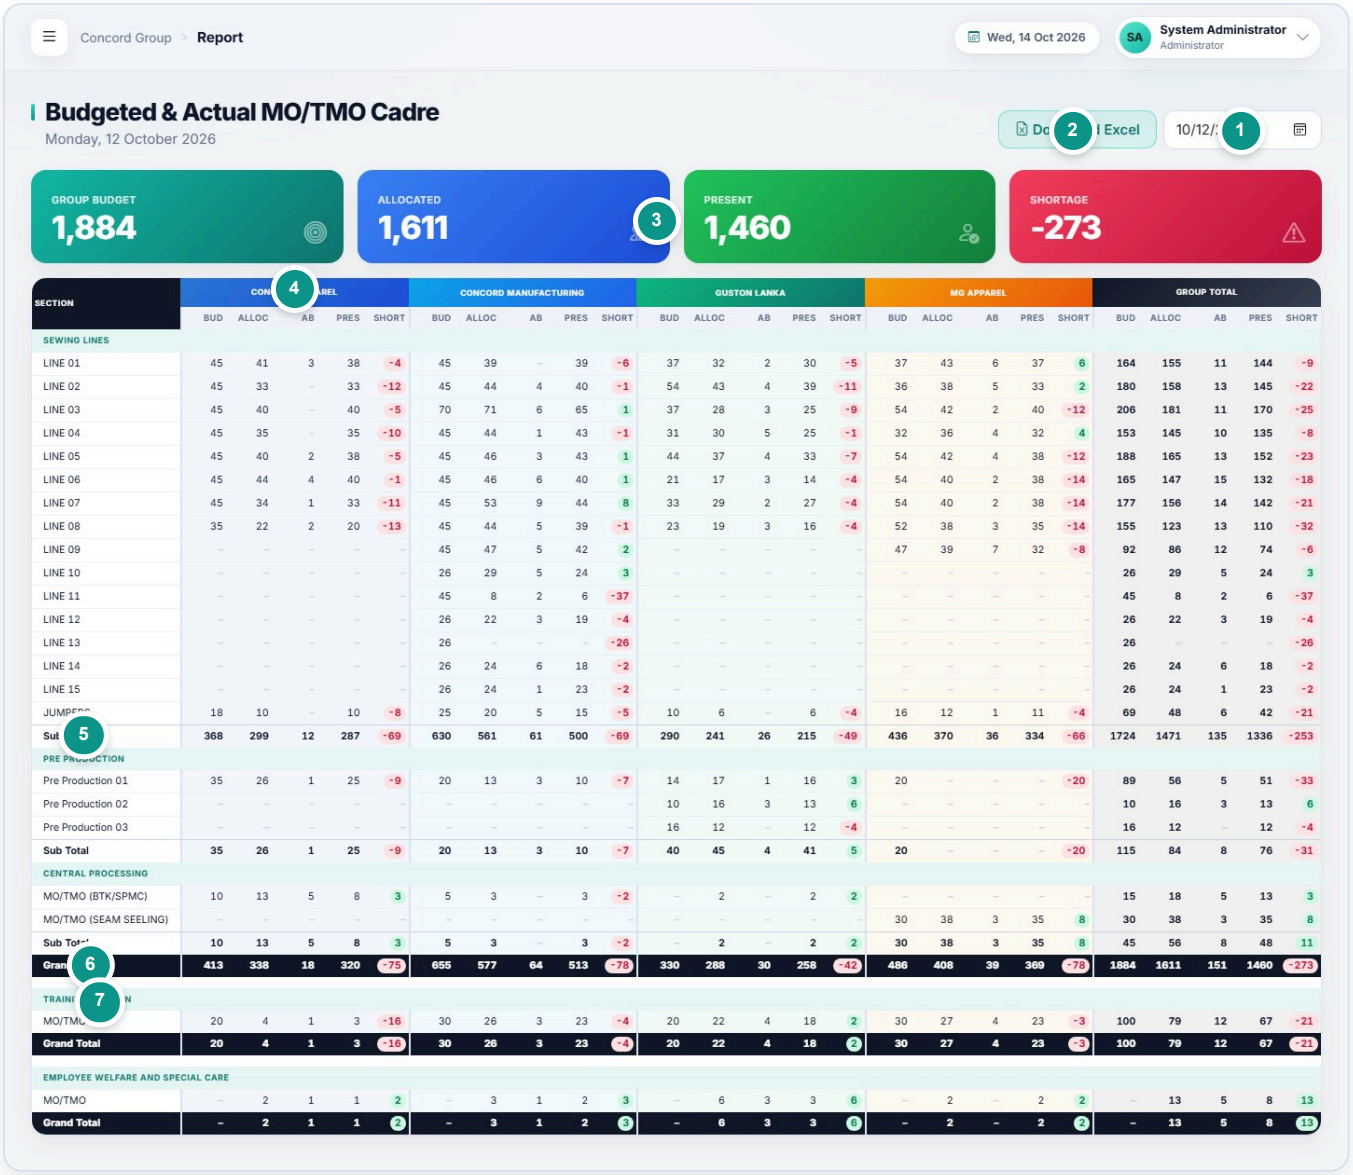

1. On the **Daily Entry** screen press **Import Excel**.
2. Press **Choose File** and pick your **.xlsx** workbook, then press **Import**.
3. The system reads every sheet and shows how many days and rows were loaded. If something could not be matched (for example a new section name) it is listed under **Needs attention**.

Important

Each sheet must have its **date in cell B3**. Days that already exist are **overwritten** with the Excel numbers. Check your workbook before you import.

6 Report

The full table for one day – every factory, department and section – with totals worked out for you.

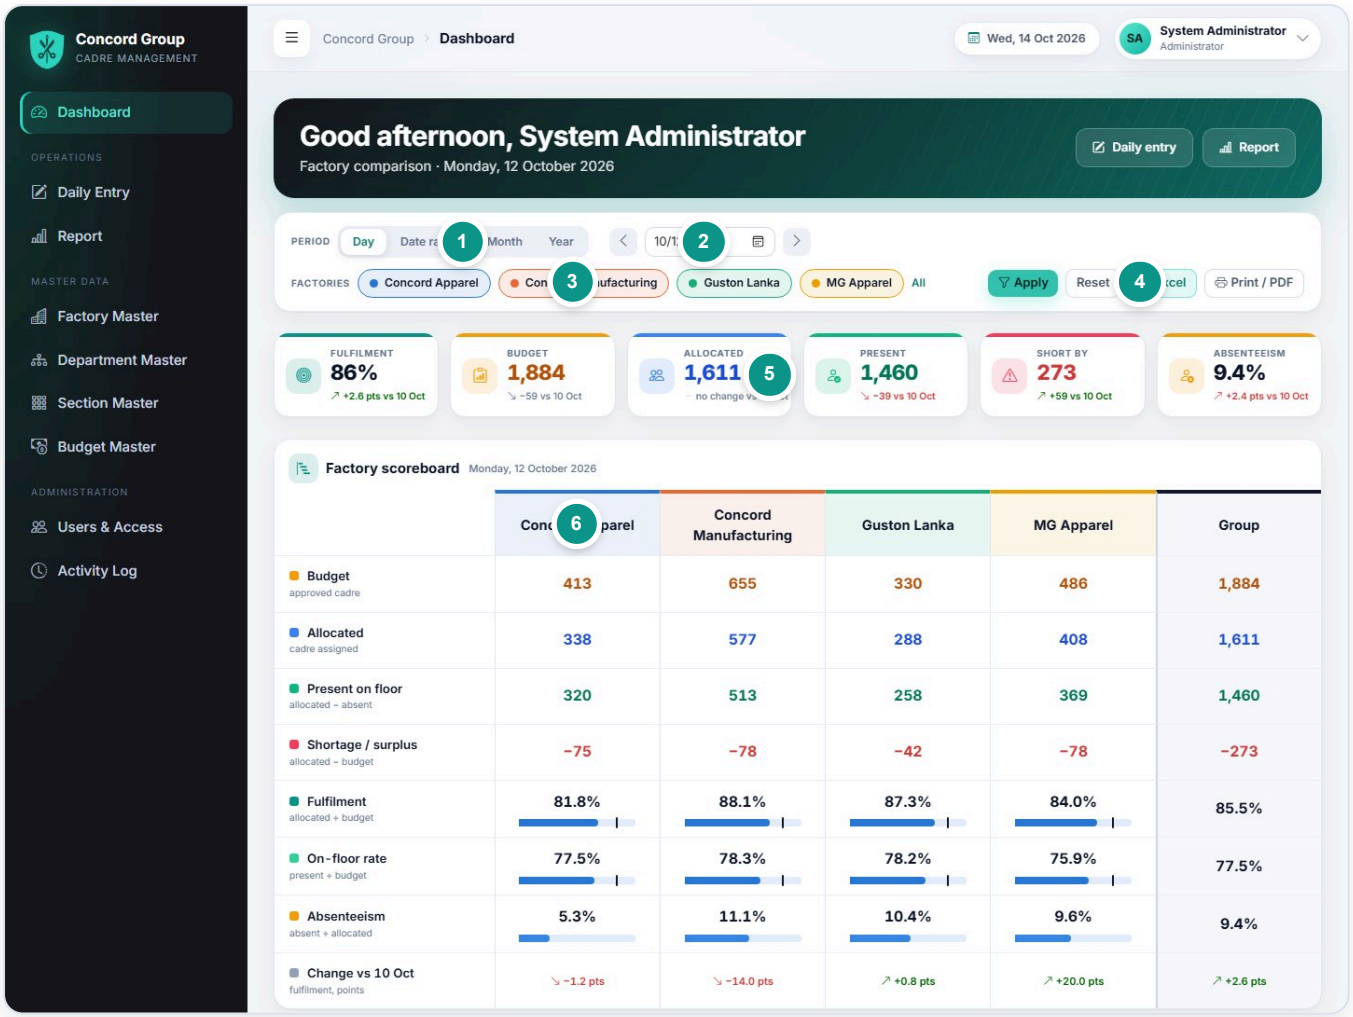

1. **Date** – pick the day to look at.
2. **Download Excel** – saves this same table as an Excel file.
3. **Four big totals** for the whole group: budget, allocated, present and shortage.
4. **One block per factory** (BUD, ALLOC, AB, PRES, SHORT) and a **Group Total** block on the right.
5. **Sub Total** – adds up one department.
6. **Grand Total** – adds up Sewing Lines, Pre Production and Central Processing.
7. **Training Section and Employee Welfare** have their **own** Grand Total, kept separate.

COLUMN	MEANING
BUD	Budget – the approved number of people.
ALLOC	Allocated – people assigned that day.
AB	Absent – people who did not come.
PRES	Present – allocated minus absent.
SHORT	Allocated minus budget. **Red (–)** = short, **green (+)** = more than budget.

7 Dashboard

The dashboard compares your factories side by side. It opens on the **latest day when every factory has entered data**.

1. **Period** – **Day**, **Date range**, **Month** or **Year**.
2. **Date / month / year** box (with arrows for the day before or after).
3. **Factories** – click a factory to switch it on or off. Click **All** to switch all on.
4. **Apply** shows your choice, **Reset** goes back, **Excel** downloads, **Print / PDF** prints.
5. **Six tiles**: fulfilment %, budget, allocated, present, short by, absenteeism – each with the change since before.
6. **Factory scoreboard** – every factory in its own column, plus the group.

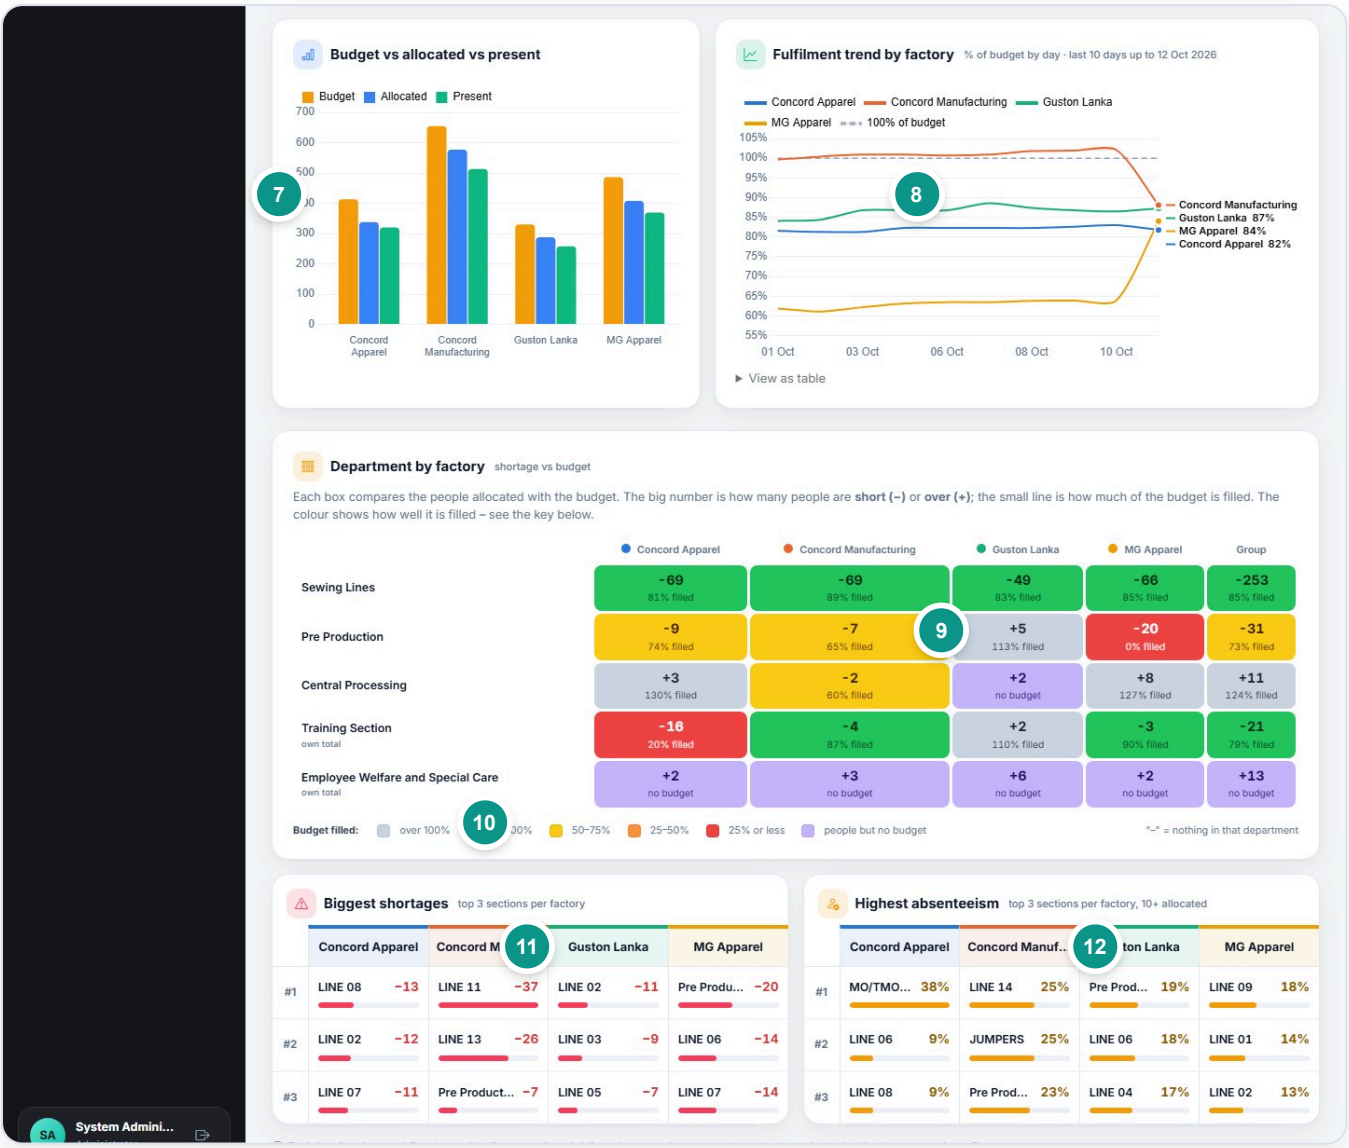

Choosing what to look at

PERIOD	WHAT YOU GET
Day	The numbers of that one day. Use the arrows to move to the previous or next day.
Date range	Pick a **from** and a **to** date.
Month / **Year**	Pick the month or year from the list (only months and years that have data appear).

For more than one day the numbers are averages per day

For a month or a year, people numbers are the **average for each day** (not added up) – so you can compare a month with another month fairly. The page says so under the title.

7 Dashboard – charts and lists

7 **Budget vs allocated vs present** – three coloured bars for each factory.

8 **Fulfilment trend** – one line per factory. A dotted line shows 100% of budget. Hover to see the numbers.

9 **Department by factory** – the colour map (next page).

10 **Colour key** – what each colour means.

11 **Biggest shortages** – the 3 sections in each factory that are most short.

12 **Highest absenteeism** – the 3 sections with the most people absent.

Downloading and printing

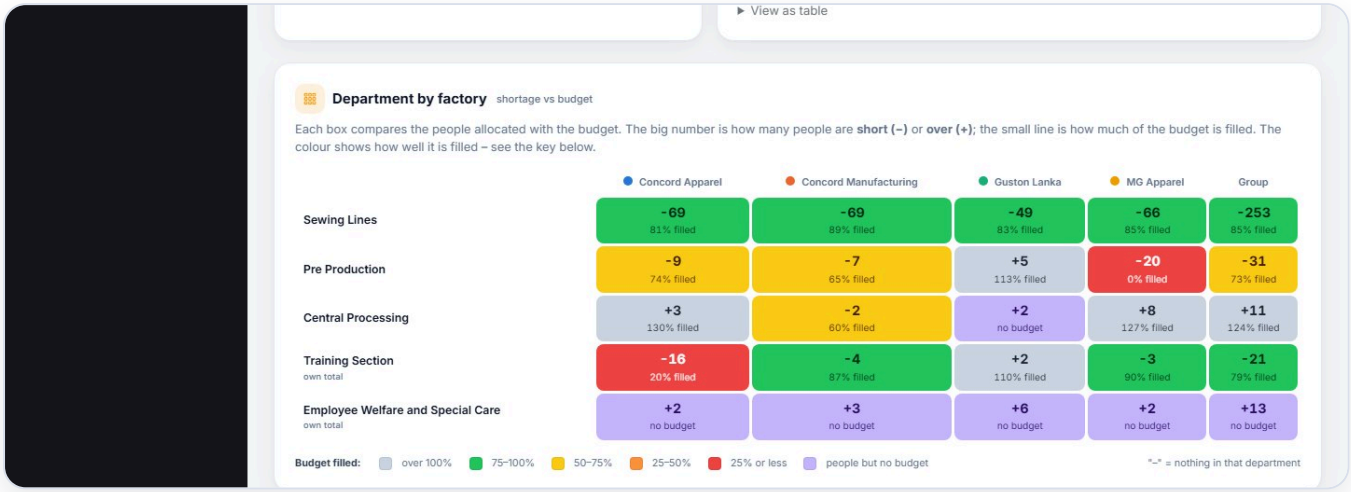

- **Excel** button – saves exactly what you see (same period and factories) as an Excel workbook with several sheets: summary, trend, departments and the top lists.
- **Print / PDF** button – opens the print window. Choose **Save as PDF** to make a PDF you can email.

Message at the top: "shows the latest complete day"

If today's numbers are only partly entered (some factories missing), the dashboard shows the last day that is **complete**, so one missing factory does not make everything look wrong. Pick today's date in the date box if you want to see it anyway.

8 Reading the heat map

"Department by factory" shows, in one glance, **where people are missing**. Each coloured box is one department in one factory.

What is inside a box

- The **big number** is how many people are **short (–)** or **over (+)** compared with the budget.
- The **small line** says how much of the budget is filled, for example *81% filled*.
- Hover your mouse over a box to read the full sentence.

What the colours mean

COLOUR	BUDGET FILLED	WHAT TO DO
Green	75% – 100%	Good. Almost or fully staffed.
Yellow	50% – 75%	Watch it. About a quarter or more is missing.
Orange	25% – 50%	Serious. Half or more is missing.
Red	25% or less	Urgent. Almost nobody is there.
Grey	More than 100%	More people than budget – maybe move some to a red box.
Purple	No budget	People are allocated but there is no budget – check the budget list.

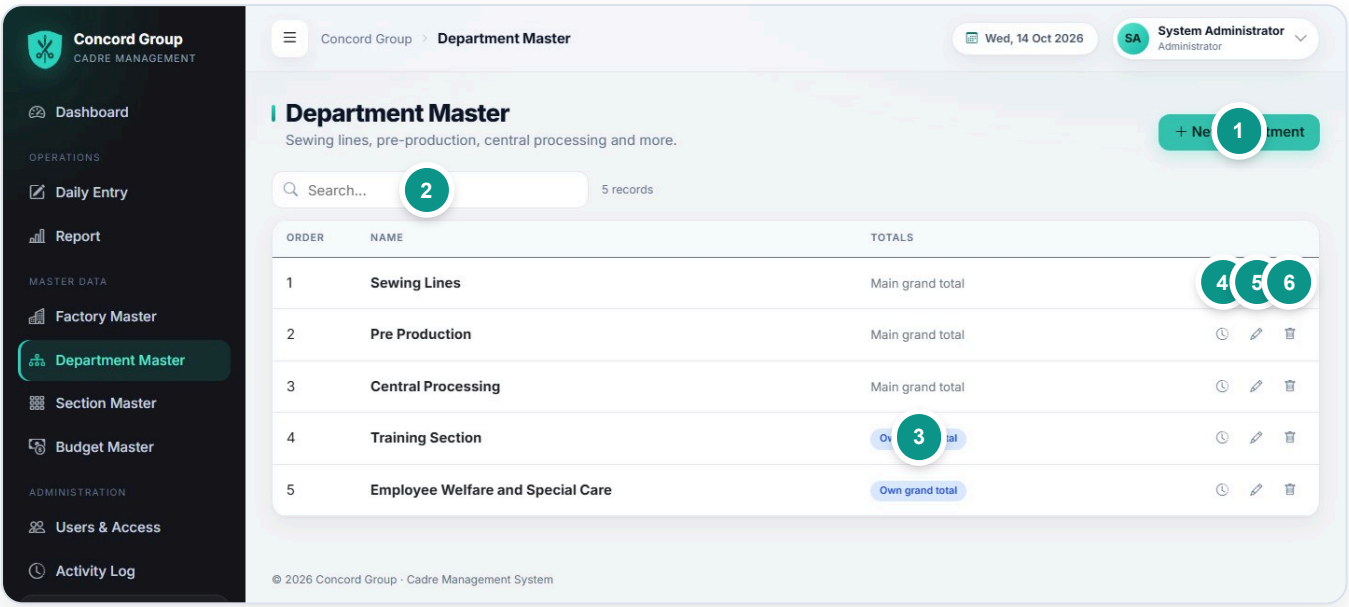

A quick example

If **Sewing Lines** in one factory shows **–69** and *81% filled* in green, that department is 69 people short, but still mostly staffed. If **Pre Production** shows **–20** and *0% filled* in red, nobody is allocated – fix this first.

A dash (–) means that factory has nothing in that department. "Own total" under a department name means it is counted separately from the main Grand Total.

9 Master data ADMIN

The master lists are the names and budgets the whole system uses. Keep them correct and every report stays correct.

1. **New** button – adds a new row (department, factory, section or budget).
2. **Search** – find a row by typing part of its name.
3. **Own grand total** – this department is totalled separately.
4. **Clock** – shows the full history of this row.
5. **Pencil** – edit the row.
6. **Bin** – delete the row (after you confirm).

LIST	WHAT IT HOLDS
Factory Master	The factories: short name, full name and the order they appear.
Department Master	Sewing Lines, Pre Production, and so on. Switch on **"Separate grand total"** for a department that should be totalled on its own (like Training Section).
Section Master	The lines and units inside each department (LINE 01, JUMPERS …). Choose the department when you add one.
Budget Master	The budget for each section in each factory. This is the starting number that appears in Daily Entry.

Adding or changing a row

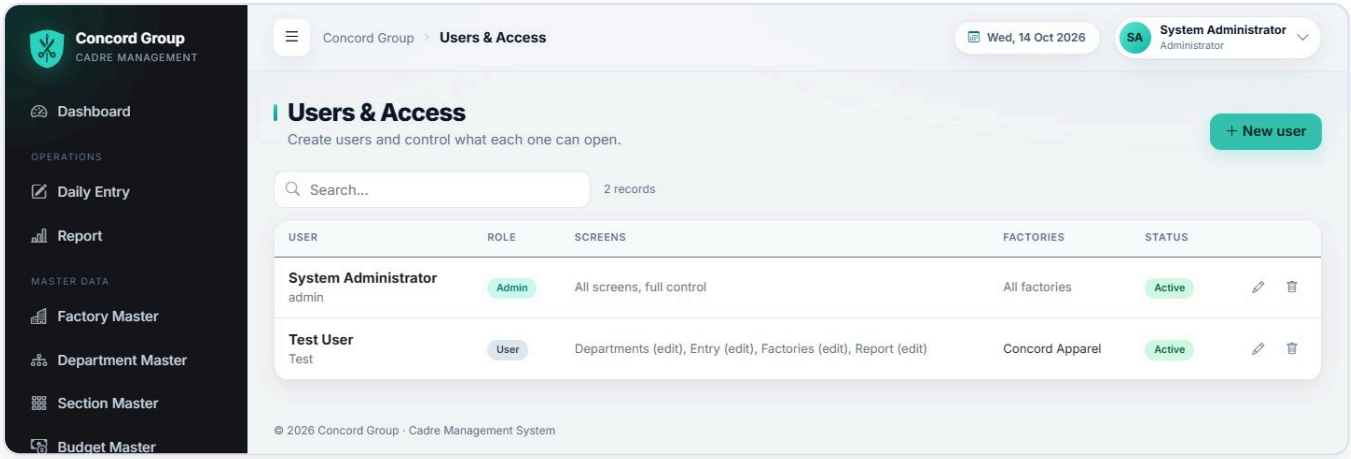

1. Open the list from the left menu and press **New** (or the pencil to change a row).
2. Fill in the form and press **Save**.

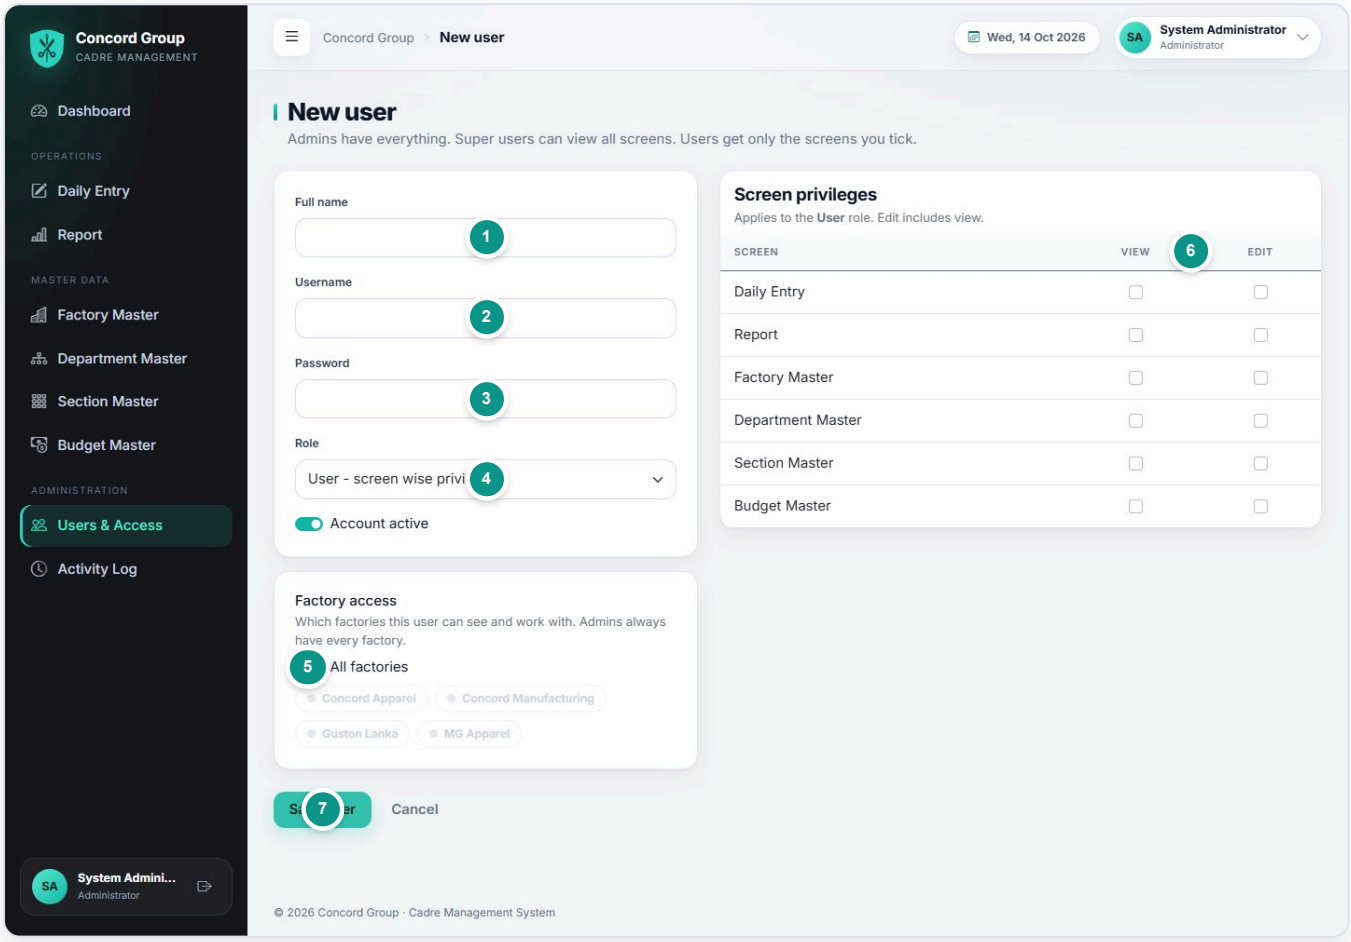

Deleting

A factory or section that already has daily entries **cannot be deleted**, and a department that still has sections cannot be deleted. This protects your history. Deleting a budget row only removes the default; days already saved keep their numbers.

10 Users & Access ADMIN

Create a login for each person and choose exactly what they may open.

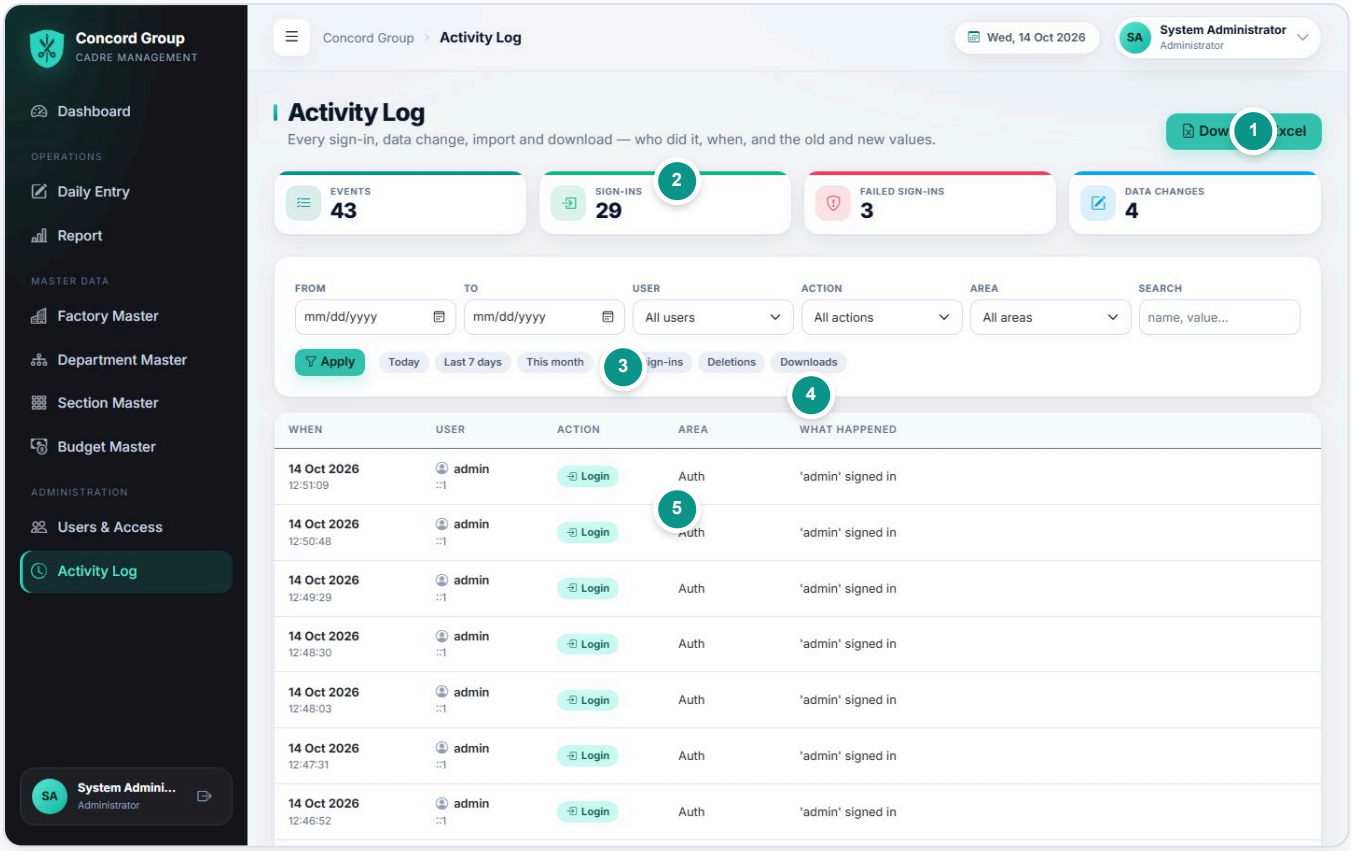

1. **Full name** – shown at the top of the screen.
2. **Username** – what the person types to sign in (must be different for each person).
3. **Password** – at least 6 characters. Leave blank when editing to keep the old one.
4. **Role** – Admin, Super User (look only) or User (choose screens).
5. **Factory access** – leave “All factories” on, or switch it off and pick the factories.
6. **Screen privileges** – for the **User** role: tick **View** or **Edit** for each screen.
7. **Save user** – creates the person.

Safety rules

You cannot delete or demote **your own** account, and there must always be **at least one active administrator**. To stop someone using the system, edit them and switch off **Account active** – they are signed out at once and their history is kept. Also use this screen to reset a password: edit the person and type a new one.

11 Activity Log ADMIN

The system remembers everything: every sign-in, every change and every download – with who did it and when.

1. **Download Excel** – saves the list you are looking at.
2. **Four counts** – events, sign-ins, failed sign-ins and data changes.
3. **Filters** – by date, person, action, area or any word.
4. **Quick links** – Today, Last 7 days, This month, Failed sign-ins, Deletions, Downloads.
5. **The list** – newest first.

What is recorded

KIND	EXAMPLES
Sign-ins	Signed in, signed out, and failed attempts (wrong password).
Data changes	Daily entries saved or corrected, factories, departments, sections, budgets, users – each with the **old and new value**.
Imports and downloads	Excel imports and every report, dashboard and log download.

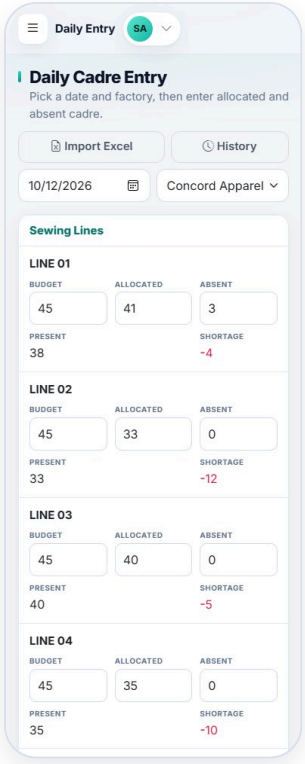

How to use it

1. Click **Activity Log** in the menu and set the filters you want, then press **Apply**.
2. **Click a row** that has a small arrow on the right to see **Before** and **After** values.
3. Press the small **clock** beside a row to see the whole history of that one record.

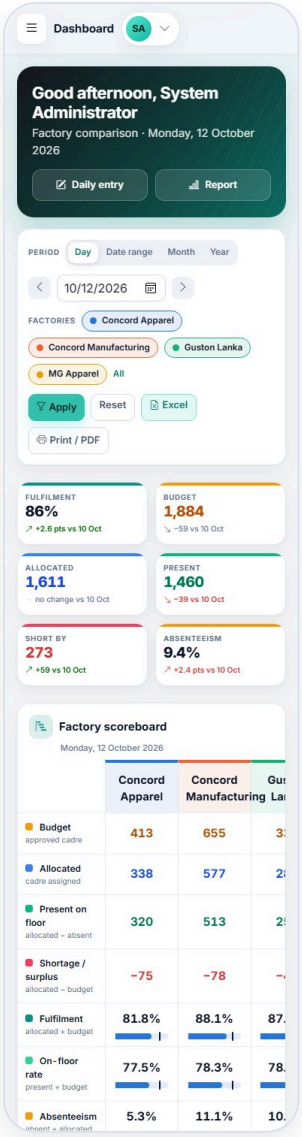

> **Why it matters**
> If a number looks wrong, the log shows who changed it, when, and from what to what. Nobody can edit or delete the log inside the system.

12 Phone and tablet

The system adjusts to any screen. Use it on a computer, a tablet or a phone with the same username and password.

Daily Entry on a phone: each section is a small card

Dashboard on a phone: tiles, then scoreboard

On a phone

- Press the **three-line button** at the top left to open the menu.
- In **Daily Entry**, each section shows three big boxes: Budget, Allocated and Absent. Present and Shortage appear underneath.
- The **Save entries** button stays at the bottom of the screen.

Wide tables

- The **Report** and the **scoreboard** are wide. **Swipe sideways** to see all factories; the row names stay in place.
- Turn the phone **sideways** for a bigger view.
- On a big monitor, the pages stay a comfortable width.

Add it to your phone's home screen

Open the system in your phone browser, open the browser menu and choose **"Add to Home screen"**. You will get an icon that opens the system in one touch.

13 Daily routine – quick card

Cut this page out or keep it next to your computer.

For the person who enters the numbers

1. **Sign in** with your own username and password.
2. Open **Daily Entry**. Choose **today's date** and **your factory**.
3. Type **Allocated** and **Absent** for every section. Check **Budget**.
4. Press **Save entries** and wait for the green "Saved" message.
5. Check the red **Shortage** numbers – tell your manager about big ones.
6. **Sign out**.

For the manager who reads the numbers

1. Open the **Dashboard**. Check the six tiles at the top.
2. Look at the **Factory scoreboard** to compare factories.
3. Look at the **heat map** – find the **red and orange** boxes first.
4. Look at **Biggest shortages** to see exactly which sections to staff.
5. Press **Excel** or **Print / PDF** to share.

For the administrator

1. Keep the **Budget Master** up to date when budgets change.
2. Add new people in **Users & Access**; switch off people who leave.
3. Check the **Activity Log** now and then, especially failed sign-ins.

14 Words used in the system

Budget
The approved number of people for a section.

Allocated
The number of people assigned to a section on that day.

Absent
People who were allocated but did not come.

Present
Allocated minus absent – the people actually working.

Shortage
Allocated minus budget. A minus number means you are short of people; a plus number means more than budget.

Fulfilment %
Allocated divided by budget. 100% means fully staffed.

On-floor rate
Present divided by budget – how much of the budget is really at work.

Absenteeism %
Absent divided by allocated.

Sub Total / Grand Total
A sub total adds one department; the grand total adds the main departments. Training Section and Employee Welfare have their own grand totals.

Section
A line or unit inside a department, such as LINE 01 or JUMPERS.

15 Questions and problems

PROBLEM	WHAT TO DO
I forgot my password.	Ask your administrator to set a new one (Users & Access → edit your name). Then change it after you sign in.
A screen is missing from my menu / "Access denied".	Your role does not include it. Ask your administrator.
I only see one factory.	Your account is limited to certain factories. Ask your administrator if you need more.
"Absent cannot exceed allocated".	Check the two numbers for that section. Absent must be equal to or smaller than allocated.
I saved a wrong number.	Open Daily Entry for that date and factory, correct it and save again. The change is recorded.
The dashboard shows an earlier day.	Today is not complete yet (some factories missing). Pick today's date in the date box to see it anyway.
Excel import says "Needs attention".	A section name in the workbook is not in the system. Add it in Section Master, then import again.
The page looks odd or old.	Press `Ctrl` + `F5` to refresh fully.
I was signed out.	For safety the system signs you out after about 8 hours without use. Sign in again; nothing saved is lost.

Still stuck?
Contact your system administrator and tell them: **which screen** you were on, **what you pressed**, and the **message** you saw (a photo of the screen helps).
